

KOREAN
CENTER, INC

Korean Center, Inc. (KCI) stands in unequivocal solidarity with the Black community in response to the senseless killing of George Floyd. We recognize there have been far too many such indiscriminate acts of violence, brutality and injustice against Blacks and other people of color. We share in the pain and grief felt by each and every one touched by this tragedy.

We believe this is a historic moment in our country, a time when we -- including the Korean American community, which has benefited from the courage of previous generations of civil rights movements -- all need to stand together to fight the pandemic of racism and injustice. These movements laid the foundation for the arrival of immigrants from all over the world, and our community's existence is deeply tied to the struggles endured by the Black community.

We support calls to identify the root causes of and legislation to dismantle the structures that facilitate systemic racism. We express our deep gratitude to all who are working on the frontlines against racism within our communities and to each and every one who is contributing in their own way to this indomitable movement to bring about lasting change.
